

CITYWIDE ALLEY RECONSTRUCTION

OVERVIEW

Location: Various Locations around Washington, DC

Client: District Department of Transportation

Period of Performance:
March 2007 – December 2011

Contract Value: \$16.8 M (all option years combined)

FMCC Job No.: 8902, 9101, 9281, 8735

Project Description

Fort Myer Construction was retained to manage the upgrading of unimproved, poorly maintained alleys throughout the city of Washington, DC. This project involved a range of surfaces - asphalt, concrete, brick and cobblestone - based on the most compatible solution for the neighborhood. In confined spaces and hard-to access areas, Fort Myer's skilled crews carefully removed old material and upgraded the alley surface to improve alleys across the city.

Project Significance

This project was one of several maintenance projects that the District of Columbia Department of Transportation had an option of renewing on a yearly basis. This project was under contract to Fort Myer Construction beginning in March 2007.
