

# AREA WATER & SEWER HOUSE CONNECTION RENEWALS

## OVERVIEW

**Location:** Prince George's County, MD

**Client:** Washington Suburban Sanitary Commission (WSSC)

**Period of Performance:**  
June 2015 – September 2017

**Contract Value:** \$2.5 M

**FMCC Job No.:** 10126

## Project Description

This contract was one of several area water and sewer house connection renewals Fort Myer Construction was responsible for completing for WSSC. This one in particular served various locations in Prince George's County, Maryland. (Other similar contracts include Temple Hills, Gaithersburg and Anacostia County.) The scope included renewal of approximately 12,325 feet of 4" through 6" sewer house connections, 530 feet of 1" through 2" water house connections and 28 sewer point repairs in various locations.

## Project Significance

WSSC is an important client for our utility division and we are proud of the service we are able to provide to Maryland residents. Thanks to our inventory of utility material, on this project we were able to consistently work through each location and simultaneously respond, repair, and re-stock in higher priority situations.
